The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Seki.

Seki (figs. 3 and 5) teaches a platform #10 having two sliding bearings at two sides (#9), a surface acoustic wave actuator (#1, #1a, #2), a slider (#4, #3, #7) and a support structure for keeping a contact pressure----“ (#3, #5, #11b, #12). Regarding claim 4 and 15 note receiving spaces for #11a, #11b (fig. 3) and the notches in side wall #9 (fig. 5).

Claims 2, 3, 5-14 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Further cited to show surface Acoustic Wave actuators are White, Asai (113), Yoshida and Asai (511).
